For any further clarifications please contact Nodal Officer District mission coordinator, Rajiv Gandhi Shiksha mission, Dantewada (C.G.) during official working hours only.

Background

Promoting innovation and creativity among school children will enable them emerge as future leaders. With Dantewada development on the fast track it is important for the the district to embrace the emerging models in the teaching methodologies. With Government of India promoting innovation among school children on a large scale in Atal Innovation Mission (AIM) and school children of Dantewada performing well on various state and national level platforms the district need to create such an infrastructure to align with the Government objectives.

Objective

Dantewada is one of the fastest developing districts of Chhattisgarh. With time the development has come in the form of infrastructure, attracting new investment and enabling the distinct population become the part of inclusive economic growth. The impact of the development can be justified through the social changes, today in the district more and more number of people are opting education for their children over farm labour, which wasn't the case a decade ago.

The impact of the innovative steps, like establishing a one stop solution for all education needs “Education city”, taken by the State and District clearly is helping to the inclusive growth of Chhattisgarh. In the recent times the students of Dantewada District have proved their talent beyond education at State level and National level platforms. We believe in order to train Dantewada students to match top quality students in the country, Dantewada district schools should offer similar support that the best students in the country are privileged with. After carefully studying various recommendations of prominent panels employed by the Government to enhance the quality of education and improve the learning experience, we believe there are better practices that need to be imparted in Dantewada District education ecosystem.

One of such recommendations from the expert committees which has seen the light of implementation through NITI Ayyog is a national level campaign called “Atal innovation mission”(AIM). AIM aims to promote innovative thinking in school children and enable them prototype their ideas, which indeed will help them emerge as future leaders. Promoting innovation ecosystem from the school level will create a positive impact on student mind and help them become problem solvers. Developed countries like USA have been successful in enabling innovation ecosystem right from the school level. Atal Innovation Mission’s impact will be an ecosystem that can sustain the Growth rate of the country and create leaders who indeed will generate jobs for the growing needs.

In this context the District Administration of Dantewada is inviting proposals from reputed agencies that are experienced in creating innovation ecosystem to enable students in the district Understand the process of ideation, Streamline the process of innovation, Develop prototyping,

Scaling of innovation, Establish infrastructure required to innovate and prototypes recommended under Atal Innovation mission. In addition the agency should be competent in nurturing students participate in State, National and International level innovation challenges, competitions, science fairs, science congress and train them towards community development. The successful agency will be the one who has an established track record in the above mentioned activity and have clear action plan with deliverables and milestones.

Period of Work

Maximum 3 years from the date of awarding of work order.

Responsibilities of the Successful Bidder

The selected agency will be responsible for following activities:

1. The agency should establish the innovation lab at the proposed location.
2. The agency should represent the school at various grant opportunities available with Government of India, state Government, international agencies and CSR donors.
3. The agency should offer training and handholding to the students in order to pursue innovation.
4. The agency should prepare and handhold the students to present their innovation on state, national and international platforms.
5. Submit quarterly progress report to the sponsoring agency.
6. Assist students to file for intellectual property protection where the cost will be met separately.
7. Bring students from different schools in the vicinity of the lab by bus and also facilitate them use the lab
8. Reach out to selected schools and conduct innovation camps to enable the ecosystem.
9. Conduct district level innovation challenge for children day and elect the winners of the competition where the cost will be met separately.
10. Capacity building for faculty in the district to nurture innovation among the school children to lead the project post agreement period.
11. Capacity building for students in the district to lead the eco system post agreement period.
